LEADERSHIP & OPERATIONS

- Technical Project Coordination & Delivery
- Team Leadership & Field Operations
- Client Communication & Stakeholder Management
- Scheduling & Resource Planning
- Task Tracking, Documentation, and Quality Control

TECHNICAL SKILLS

- Full-Stack Development (React, Next.js, Node.js, HTML5, CSS3 JavaScript ES6+)
- Troubleshooting & Systems Optimization
- AV & Low-Voltage Systems Integration
- Network & Infrastructure Systems (Routing, Switching, Cabling)
- Computer and Server Configuration and Deployment

PROFESSIONAL EXPERIENCE

Team Lead:

PJS Systems | 2020 - 2024

- Led teams of up to 8 technicians delivering commercial AV and network infrastructure projects across multiple sites
- Managed scheduling, blueprint interpretation, installer and contractor coordination to ensure on-time delivery
- Served as primary liaison between field teams, project managers, and stakeholders
- Installed and integrated AV and network systems; delivered completed projects for UBC, TransLink, BC Courthouses, Langara College, RCMP, and more

Data & Security Installation Technician:

Smart Connex Inc. | 2018 - 2020

- Owned and operated a low-voltage cabling and security installation business serving residential and commercial clients
- Managed full project lifecycle including estimating, system design, installation, troubleshooting, and customer support
- Installed structured cabling systems, configured routers and switches, and deployed surveillance solutions
- Oversaw budgeting, procurement, and vendor coordination

Service Coordinator:

Logic Managed IT Services | 2015 - 2018

- Coordinated service delivery operations between clients and technical teams in a fast-paced IT environment
- Managed scheduling, ticket prioritization, and communication to ensure timely resolution of technical issues
- Acted as a bridge between technical staff and non-technical clients
- Utilized Microsoft Office Suite to manage data, reporting, and daily operations

Field Service Technician

Ledcor Technical Services | 2008 - 2013

- Installed and maintained TELUS home service infrastructure across residential accounts
- Scheduled and confirmed customer appointments to ensure timely service delivery
- Provisioned and supported POTS, ADSL and GPON services
- Diagnosed and resolved service issues to maintain network reliability and customer satisfaction
- Consistently completed daily assigned installations and service calls in a timely and efficient manner

Field Service Technician

J-Comm Communications | 2005 - 2008

- Installed and configured Shaw (now Rogers) residential communication services
- Diagnosed and resolved service issues to maintain network reliability and customer satisfaction
- Completed 5-8 service calls per day in a high-volume, 6-day work week environment
- Performed coaxial cable connections, installations and RF signal testing
- Set up and configured digital set-top boxes (STBs) and VoIP telephone gateways

Order Management Specialist

Xantrex Technologies | 2002 - 2005

- Managed 40+ client accounts, including major customers such as Freightliner and Boeing
- Coordinated Return Material Authorization (RMA) processes to ensure efficient product returns and issue resolution
- Resolved customer delivery challenges by coordinating with logistics and internal teams
- Maintained accurate and detailed documentation for orders, returns, and customer communications

TECHNICAL PROJECTS

TaskNova (Mini SaaS Platforms) | 2025 – Present <https://tasknova.ca>

Designed and deployed a web platform using Next.js, React, Supabase (PostgreSQL), and Vercel to attract and support small business clients seeking modern web business solutions.

Bells & Whistles Designs (Web and Application Portfolio Platform) | 2025 – Present
<https://bellsandwhistlesdesigns.github.io>

Built a responsive web and application portfolio platform to showcase my web and application projects, incorporating API integrations and scalable serverless architecture.

TECHNICAL KNOWLEDGE

- Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, C#, PHP, SQL
- Frontend: React, Next.js, Responsive Design
- Backend: Node.js, REST APIs, Authentication Systems
- Databases: PostgreSQL, MySQL
- Tools & Platforms: Vercel, Netlify, GitHub, CI/CD Pipelines

EDUCATION

- Diploma, Web & Application Development | CDI College | 2024 – 2025
- Diploma, Network Systems Engineer | CDI College | 2013 – 2014
- Honors Diploma, E-Commerce & Business Management | Sprott Shaw College | 2002 – 2004

CERTIFICATIONS

- CompTIA TestOut A+ Certification 2002
- CompTIA TestOut Security + Certification 2002
- Extron AV Associate 2022
