PROFESSIONAL SUMMARY

Technical Project Lead with 13 plus years of experience delivering complex AV, telecom, and networked system installations across commercial and institutional environments. Proven ability to lead teams, manage multi-million-dollar projects, and coordinate cross-functional stakeholders from planning through execution.

Combines deep hands-on systems knowledge with business management training and emerging full-stack development skills. Recently designed and deployed a SaaS platform to support real-world operational workflows, bridging physical systems and modern software solutions.

CORE SKILLS

- Technical Project Coordination & Delivery
- AV & Low-Voltage Systems Integration
- Team Leadership & Field Operations
- Client Communication & Stakeholder Management
- Network & Infrastructure Systems (Routing, Switching, Cabling)
- Budgeting, Scheduling & Resource Planning
- Troubleshooting & Systems Optimization
- Full-Stack Development (React, Next.js, Node.js)

PROFESSIONAL EXPERIENCE

Team Lead:

PJS Systems | 2020 – 2024

- Led cross-functional teams of up to 8 technicians on large-scale commercial AV and network infrastructure projects
- Coordinated project execution including scheduling, budgeting, blueprint interpretation, and contractor alignment across multiple job sites
- Acted as primary liaison between field teams, project managers, and external stakeholders to ensure clear communication and successful delivery
- Directed weekly planning meetings and maintained accountability for milestones, timelines, and quality standards
- Designed and implemented AV and network systems including structured cabling, switching, and hardware integration
- Delivered projects for major organizations including TransLink, BC Courthouses, Langara College, RCMP, and UBC

Owner / Data & Security Installation Technician:

Smart Connex Inc. | 2018 – 2020

- Owned and operated a low-voltage cabling and security installation business serving residential and commercial clients
- Managed full project lifecycle including estimating, system design, installation, troubleshooting, and customer support
- Installed structured cabling systems, configured routers and switches, and deployed surveillance solutions
- Maintained strong client relationships, resulting in repeat business and referrals
- Oversaw budgeting, procurement, and vendor coordination

Service Coordinator:

Logic Managed IT Services Company | 2013-2018

- Coordinated service delivery operations between clients and technical teams in a fast-paced IT environment
- Managed scheduling, ticket prioritization, and communication to ensure timely resolution of technical issues
- Acted as a bridge between technical staff and non-technical clients

TECHNICAL PROJECTS

Founder & Developer

TaskNova (Mini SaaS Platforms) | 2025 – Present

<https://tasknova.ca>

- Designed and built a full-stack SaaS application to manage task workflows and operational processes
- Developed using Next.js, TypeScript, and Supabase (PostgreSQL)
- Implemented secure authentication, user isolation (RLS), and scalable database architecture
- Managed full deployment lifecycle including hosting (Vercel), CI/CD, domain configuration, and environment management
- Focused on performance optimization, usability, and real-world application of system design principles

Developer

Bells & Whistles Designs (Portfolio Platform) | 2025 – Present

- Built and deployed a responsive web platform with live API integrations and serverless backend functions
- Implemented state-aware UI and optimized performance with caching strategies

- Maintained structured repositories with clear documentation and version control practices
-

TECHNICAL KNOWLEDGE

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, C#, PHP, SQL

Frontend: React, Next.js, Responsive Design

Backend: Node.js, REST APIs, Authentication Systems

Databases: PostgreSQL, MySQL

Tools & Platforms: Vercel, Netlify, GitHub, CI/CD Pipelines

EDUCATION

Diploma, Web & Application Development | CDI College | 2024 – 2025

Diploma, Network Systems Engineer | CDI College | 2013 – 2015

Honors Diploma, E-Commerce & Business Management | Sprott Shaw College | 2002 – 2004

ADDITIONAL

- Known for strong accountability, reliability, and ownership of outcomes
- Proven ability to adapt across industries and rapidly learn new systems
- Combines hands-on technical experience with leadership and business insight
